DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 45 and 46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation of interchangeable of the body is considered to be a new matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29-35 and 37-44, 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Heintzelman (US 4 123 998). Heintzelman discloses a main combustion chamber for receiving a dilute combustion mixture (30) and an auxiliary combustion cavity (28) at least a portion of the dilute combustion mixture from the main combustion chamber through an open end of the auxiliary combustion cavity such that substantially all of the combustion mixture in the auxiliary combustion cavity is the dilute combustion mixture received from the main combustion chamber, the auxiliary combustion cavity being disposed outside of the main combustion chamber, igniting the dilute combustion mixture in the auxiliary combustion cavity with an ignition source

Art Unit: 3747

in the auxiliary combustion cavities the auxiliary combustion cavity sized to substantially protect the ignition source from fluid movement within the combustion chamber and cause at least a portion of the dilute combustion mixture adjacent the ignition source to be substantially quiescent; and igniting at least a portion of the dilute combustion mixture in the main combustion chamber with the ignited dilute combustion mixture from the auxiliary combustion cavity.

Claims 29-35 and 37-44, 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Goto (US 6 209 511).

Claims 29-35 and 37-44, 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Fisher (US 2 646 782).

Claims 29-35 and 37-44, 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Meyer (US 1 956 805).

Response to Arguments

Applicant's arguments filed September 9, 2005 have been fully considered but they are not persuasive. The issue in this application is whether the sized to create at least a portion of the dilute combustion mixture adjacent the ignition source to be substantially quiescent. Since the instant invention does not distinguish over the cited prior art references structurally as well as functionally, such limitation would be inherent.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
